REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Takahashi teaches that hydrogen peroxide is evacuated *before* the ozone is introduced into the chamber. Thus, there is no step of diffusing both hydrogen peroxide and ozone within the chamber and in fact, it would be counter-intuitive to do so since Takahashi wishes to limit the amount of ozone necessary to be used by removing as much hydrogen peroxide as possible from the chamber before the ozone is added. Thus, when the ozone is added, the only remaining hydrogen peroxide in the chamber is that absorbed/attached to the articles within the chamber which is incapable of 'diffusing,' as required by the instant claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
